

APPENDIX A

Version with Markings
to Show Changes Made to the Claims

The following are marked up versions of amended Claims 2-5:

2.(AMENDED) The method of claim 4[1], wherein the content information is selected from a broadcast or a multicast program guide[(310; 402)].

3.(AMENDED) The method of claim 4[1], further comprising:
-enabling the end user to specify a time frame for making the recorded content information available for play-out at the specific location.

4.(AMENDED) [The]A method of enabling a user to access content information, the method comprising: [claim 1,]

-enabling the user to select the content information for recording;

-enabling the user to select at least a specific one from multiple locations for play-out of the recorded selected content information;

-making the recorded selected content information available for play-out at the specific location; and

wherein:

-the specific location has a recording system[(Fig.4, 304)]; and

-the recording takes place at the specific location.

5.(AMENDED) [The]A method of enabling a user to access content information, the method comprising:[claim 1,]

-enabling the user to select the content information for recording;

-enabling the user to select at least a specific one from multiple locations for play-out of the recorded selected content information;

-making the recorded selected content information available for play-out at the specific location; and

wherein:

- the content information is recorded at a first recording system[(108)];
- the making available comprises supplying the recorded selected content information from the first recording system to the specific location.
